Evening Brief

Date: Monday, July 31, 2017

Weather Summary

*** Near Record Breaking Heat This Week ***

*** Critical Lightning in the Same Areas Friday-Weekend ***

Strong high pressure will build across Nevada through this week, bringing increasingly hot temperatures to most of the area, particularly western Nevada and portions of southwest Idaho. Temperatures will be closer to normal across far southern portions of the Great Basin where lingering moisture will result in some clouds and afternoon thunderstorms across the higher terrain.

Preparedness Levels

| | |
|-------------|---|
| Great Basin | 3 |
| National | 4 |

Great Basin Fire Activity (from Irwin): Light Activity

New Fires and Acres: 21 fires for 4104.4 acres, 22,212 acres large fire growth, 1 new large fires

Resources:

- Crews: 14 T1 IHCs in GB: 9 committed, 1 R&R, 3 available.
 - GBCC has committed an estimated 92 + type 3, 4, 6 engines.
 - 2-T1 and 6-T2 helicopters are available in GACC.
-

Great Basin Fire Potential Summary

Fuels continue to dry out across much of the region, as we are several days into strong high pressure suppressing monsoonal activity. Lighter fuels, represented by 10-hr FM have, and will continue to see the most rapid drying over the next few days.

ERC's remain critical over much of Idaho, and will only continue to dry out further this week during the upcoming heatwave.

Fire danger remains elevated across far western and northern portions of Nevada as well, with the rapid drying of lighter fuels.

Great Basin
Coordination Center

Sagebrush live fuel moisture, which has a much slower response time to short term precipitation, has been on a rapid downward trend the past few weeks in most areas, finally reaching near to even below normal mid-summer levels across the northern and western portions of the Great Basin. Sagebrush live fuel moisture across Central NV/Utah has dropped significantly to below normal and in some areas is approaching record lows.

We have issued a Great Basin *Fuels and Fire Behavior Advisory for Nevada and Utah*, available at the following link:

https://www.predictiveservices.nifc.gov/fuels_fire-danger/GB_Fuels_and_Fire_Behavior_Advisory.pdf

Current Incident Details

Today's Activity (from WFDSS):

| Incident Name | Unique Fire Identifier | Size | Status | Latitude | Longitude | Pt. Of Origin Sage Grouse Habitat |
